AbsoluteProof® for Microsoft® Exchange Server

Module Brief

Explosive Email Volume Escalates Your Organizations Risk

Email files can be one of the most litigious types of digital content in today's enterprise. Increasingly, organizations must produce archived emails as evidence in a legal, regulatory, or patent dispute. And the ease with which email records can be backdated, deleted, or altered puts organizations at extreme risk. How can you be certain that the emails you retrieve from your archiving system are authentic and have not been altered since they were first sent or received? Now more than ever, you need AbsoluteProof® from Surety.

Protect the Integrity and Defend the Authenticity of Email Content

With the AbsoluteProof trusted time-stamp service and a Surety Integrity Seal™ applied to your Microsoft Exchange email files and attachments, you'll have the ability to protect the integrity and defend the authenticity of this critical enterprise content, and will be in the strongest possible position if you were ever to enter into a legal or regulatory challenge.

Product Features:

- Supports Microsoft Exchange Server 2003
- Seamlessly integrates with Exchange Message Journaling
- Transparent sealing of inbound and outbound mail
- Supports sealing of original message and message headers
- Seal protects the body of the mail and any attachments
- Asynchronous sealing doesn't interfere with message delivery
- ANSI X9.95 and ISO/IEC 18014-3 standard-compliant Seals.

THE POWER OF PROOF

AbsoluteProof for Microsoft Exchange Licensing:

- Annual subscription with tiered, volume-based pricing (number of "sealing" transactions)
- Subscription includes all service updates and email support

AbsoluteProof for Microsoft Exchange System Requirements:

- Microsoft Exchange software license
- See Microsoft Exchange documentation for system requirements
- Internet connection

How it Works

- Sealing is done asynchronously so it does not impact mail traffic.
- Seals are stored as attachments to the envelope message.
- Raw Seals or AbsoluteProof "Digital Evidence" Envelopes can be attached.
- AbsoluteProof Envelopes prevent modification when content is transferred.
- Mail and Seals can be exported to an external message archive.
- Message journal can be viewed using an e-mail client (e.g., Outlook).
- Any third party can easily validate sealed mail using the freely-available AbsoluteProof Viewer.

Where it Works

- Highly litigious industries that face frequent litigation and regulatory scrutiny: manufacturing, consumer products, construction, transportation, medical supply, healthcare, pharmaceutical and life sciences
- Organizations that must satisfy evidentiary and compliance mandates where electronic records must be protected from harm and safeguarded against unauthorized access and manipulation
- Industries in which long-lasting proof of data integrity are critical to business success.

About AbsoluteProof Data Integrity Protection Service

With millions of electronic records and files worldwide "sealed" by its service, Surety is a leading provider of data integrity protection solutions. Surety's AbsoluteProof trusted time-stamp service can mitigate risk, create significant business value, and defend the integrity and authenticity of electronic records and other valuable digital content.

AbsoluteProof ensures against content tampering by providing a "digital wax seal" for all types of electronically stored content. Backed by a legal defensibility guarantee, AbsoluteProof ensures that electronic records, files, documents and other digital content sealed using the AbsoluteProof service will withstand the toughest legal scrutiny.

To learn more about how Surety's AbsoluteProof trusted time-stamp service can help you protect the integrity and legally defend the authenticity of your digital assets, visit www.surety.com.

Think of us as the modern-day "Digital Wax Seal"
