Every report is automatically time-stamped and digitally notarized by Surety's data integrity service.

Data integrity

Surety Inc.'s AbsoluteProof Data Integrity Service was selected by Law Enforcement Services Inc. (LESI) to secure files used for personnel screening by law enforcement, corrections and public safety agencies. AbsoluteProof, powered by Surety's Digital Notary Engine, generates irrefutable evidence of exactly what electronic records were created and precisely when — without using private keys or certificates. AbsoluteProof helps clients validate that digital information was created exactly when claimed and has not been altered since.

LESI offers two solutions to help agencies quickly target their recruitment efforts toward the most-qualified applicants: onlinePHQ automates the collection and analysis of personal history information, and Multi-domain Screening aggregates various measures of applicant suitability into a single report. AbsoluteProof protects the authenticity of the personnel records created with those systems indefinitely.
